

Project manager in translational research and fundraising

A project manager position is open at the Inserm Institute for Viral and Liver Disease (Inserm U1110) and the Laboratory of Excellence HepSYS (Head: Prof. Thomas F. Baumert, MD) at the University of Strasbourg, France. The institute is located in a state-of-the-art infrastructure and an internationally renowned research environment. Inserm and the University of Strasbourg are consistently ranked among the leading research organisations. The institute focuses on the discovery and development of novel preventive and therapeutic strategies for liver disease and cancer and is funded by the European Commission, the French Agency for Research, the US National Institutes of Health and Pharma.

What we offer

Aiming to translate and advance research discoveries of the institute into the clinic, the project manager will manage the institute's fundraising program on the EU and international level together with the leadership of the institute, participate in the management of translational research programs and promote the commercialisation strategy of the institute in collaboration with the University of Strasbourg Technology Transfer Organisation and Pharma partners. We provide the opportunity to work in a highly dynamic and international environment and a world-class network within academia, funding organisations and industry. Furthermore, we offer a competitive remuneration package, mentoring and long-term career opportunities within the University of Strasbourg tenure-track program as well as our collaborating partners in academia and industry.

Profile

You are highly motivated and have a background in research and development in biomedical sciences (Master or PhD degree) with experience in project management in either academia or industry. You are open-minded, a team player (able to communicate and work within an international team as well as independently to a high standard), hands-on, alert and good eye for details. You are able to draft high-quality proposals, presentations and reports in collaboration with our team. You have excellent communication skills in written and spoken English. Fluency in French would be a plus but is not a prerequisite.

To apply, please send your motivation letter (why you are interested in this position and long-term career goals) and CV (work experience and two references) to Prof. Thomas Baumert (Thomas.Baumert@unistra.fr) and Dr. Catherine Schuster (Catherine.Schuster@unistra.fr).
